

PWISTA Summer 09 Institute

Methods of Teaching AP Biology for Novice AP Biology Teachers

Presented by

Professor Leo Alves, Ph.D., Manhattan College, Bronx, NY
Professor Patricia A. Grove, Ph.D., College of Mount Saint Vincent

This laboratory-intensive course provides an overview of the basic structure and content necessary for an Advanced Placement Biology course. The course will incorporate insights from recent work of the AP Biology Development Committee as well as some recent administrations of the AP Biology Examination. The examination and its grading will be discussed. Participants will develop a detailed syllabus and course calendar for an AP Biology course. Participants have the opportunity to perform most of the laboratory exercises mandated for an AP Biology course.

This Institute will provide information and materials to participating teachers that will:

- Enhance your classroom presentations in many areas.
- Encourage teachers to use methods in their classrooms that involve new demonstration ideas
- Expand the scope of your laboratory activities using computer interfaced equipment.
- Provide a forum for discussion and sharing of their materials and ideas.
- Refine your skills in examination preparation
- Curriculum Structure and Sequencing
- Context Knowledge for the Specific Discipline
- Methods of Teaching Specific topics within the Curriculum

Date: June 29th – July 2nd, 2009

Time: 8:30 AM-4:00 PM

Cost: \$595.00

Place: Science Wing, Mahopac High School, Mahopac, NY
